

New for 2007: Ground Fountain Quiet Flow and Pet Friendly

Marble Gardens designed its Ground Fountain in response to requests for a small, easy to install ground level fountain, providing an unobtrusive, background sound of flowing water. The Ground Fountain is also pet friendly.

The Ground Fountain is 24" in diameter and 6" high. Net weight of the Carrara white marble basin is 100 lbs. Honed/matte finish. Marble Gardens includes a commercial grade pump and underground housing, 2 interchangeable brass nozzles, a brass nozzle stem and no-clog drain, all tubing and accessories, and step-by-step directions.

Requires a 120 v, GFCI-protected power source, installed by a registered electrician. Other required installation skills similar to installing a tree of similar weight.

The high density of Italian marble and our finishing techniques make our ornaments resistant to dirt and staining, including from visiting birds. Maintenance consists of washing down and refilling with a hose. In most locations and depending whether the jet nozzle or 2-tier nozzle is used, the Ground Fountain must be refilled 2-3 times a week. In winter, the Ground Fountain needs no covering from snow.

Price: \$1,850 for Carrara white marble. Price includes airfreight delivery curbside, East coast. Estimated delivery time is 4 - 6 weeks. For Midwest and Western addresses, please request a quote.

Marble Gardens is a custom fabricator of top-of-the-line marble, granite and sandstone ornaments, including benches, columns, fountains, bathtubs, sinks, vases and ornaments of all types. All work is made to order. The Marble Gardens workshop is located in Carrara, Italy, the world capital of marble.
